FIRE MARSHAL EXPECTATIONS

The provided document is intended to provide organizers and promoters with a synopsis of the fire code requirements during the planning phase of events taking place at the Irving Convention Center. Cooperative planning allows for flexibility and consideration of special circumstances that might arise during the planning phase of an event. Failure to provide plans can bring about circumstances that can limit the Fire Departments ability to consider alternative methods to achieve code compliance and safety, thereby requiring the Fire Department to enforce the Fire Code in its most strict interpretation. Such circumstances, in the most extreme cases, could force the Fire Department to shut down an event. Working together will significantly reduce the odds of such a circumstance from ever occurring.

Provided below are the general areas of concern for the ICC in regards to fire code compliance. Feel free to contact the Fire Marshal's Office anytime a question arises regarding fire code compliance.

Occupant Load (IFC 1002)

Occupant loads established by the Building Code Official shall be strictly adhered to. Signs shall be posted throughout the ICC as required by Code.

Definition – The number of persons for which the means of egress from a building or portion thereof is designed.

Site Inspection (IFC 109.3, 111.4)

The Fire Department shall conduct a site inspection prior to the event to ensure adequate time for mitigation measures for any fire code deficiencies. Any unacceptable issues found before or during the event can be cause for cessation of that activity or event until deficiencies are corrected. Events without plans and visits will be subject to stop orders.

Fire Lanes (IFC 503)

- Minimum width: 24 feet unobstructed with 14 feet of vertical clearance.
- Where fire lanes are required, approved signs or markings shall be provided to identify fire lanes so as to prevent obstructions.
- Fire Lanes must not be blocked at any time, for any reason.

Fire Extinguishers (IFC 906)

- For general fire protection a 2A-10BC size extinguisher is recommended and will be required throughout the building per code.
- Fire extinguishers must be inspected and tagged by a state-licensed inspector annually. Extinguishers without an inspection tag or with an expired tag will not be permitted.
- A class K rated portable extinguisher is required to be within thirty (30) feet of a cooking location. This is in addition to the 2A-10BC general fire protection extinguisher.

Exits (IFC Chapter 10)

- During event hours, exits may not be locked, fastened or blocked in any manner
- At outdoor events where patrons are assembled in a fenced, barricaded, or roped off area emergency exits must be provided. The size and number of these exits will be approved by the Fire Marshal's Office.
- Emergency exits must be marked by a durable weather resistant red sign with white lettering. The minimum size of lettering for such signs is six (6) inches in height with a 3/4 inch stroke (width).

- Tents, canopies and membrane structures shall not be located within 20 feet of other tents, vehicles or internal combustion engines. There shall be a fire break between tents with a minimum gap of 12 feet and be free of guy ropes or other obstructions.
